## Just for Today

### *Leverage*

It isn't that hard to make your first million, says [Linda Pond](#), colleague, mom, and inventor extraordinaire. Her secret? Getting the right team around her, using their expertise, and most of all putting ideas into ACTION.

**Just for today:** stop trying to figure it out yourself. Draw on the expertise of others and get growing. After all, everyone has at least one million dollar idea in their head. Few people actually act on it.

*Angela*

**PS** next time you're in Canadian Tire, Wal Mart or any number of camping stores, check out the Cooler Light - Linda's daughter's idea, and Linda's invention. In fact, why don't you pick one up, take it back to the office, and put it up as a reminder. One woman, one team, one million, and counting!
